

SHAKE, RATTLE, AND ROLL: SAMPLE STUDENT PRODUCTS

Earthquake-proofing a School: Exceptional Example

This poster is an example of a great student product. The fulfilled all of the required items. It had the description of the building and how it was specifically designed to be earthquake proof. The evacuation plan was also attached to this work that described in detail the steps to take for evacuation due to an earthquake. The picture was not greatly drawn, but the idea was good and it fulfilled the requirements.

Earthquake-proofing a School: Mediocre Example

This example was chosen because it is simply a picture of a school. There was no explanation of why this building is earthquake proof nor was it shown in the design. In addition, they did not include an evacuation plan.
